Team Name: sdmay21-24
Team Members: Rene Chavez, Jacob Gleason, Ian Kegley, Abdul-Salam Adedoja, Tyler Norris
Report Period: Sept 14th - Sept 27th

Summary of Progress in this Period
- Continued our learning about the different technical aspects of the project
- We did some research about the different languages, frameworks, and other technical components we could use for our project
- Presented what we learned about each language and framework to our faculty member/advisor

Pending Issues
- No big or main issues aside from just familiarizing ourselves with the languages, frameworks, etc. that we will be using for our project

Plans for Upcoming Reporting Period
- Create a more detailed block diagram for the project with frontend to backend connections
- Enhance our understanding of frontend web services/webpages and key application programming interfaces (APIs) for the project
- We may also learn more about Google Cloud Platform (GCP) resources and how we will utilize them for the project
